About

I prioritize meeting and exceeding the delivery objectives established with clients, emphasizing timely completion and the successful fulfillment of their goals. I can work well in a team. I focus on writing code in Javascript and use the React library and Next frameworks in the Frontend. Furthermore, I prefer writing codes on typescript because of its performance for developer and easier to write accurate code more quickly and catch bugs prior to runtime On the backend I use Node.js. Moreover, my last projects are done in Nest js. I want to participate in big projects and I can justify my knowledge.I entered this field in February 2022 and has been interested in this field since when I started. Since now I have done more than 15 real projects

Experience

Freelancer | Remote

Full Stack and Telegram bot Developer | 10/2022 - 02/2023

I started working in this sphere as a freelancer of full stack development and Telegram bot creation. I've successfully navigated the challenges of the industry for a continuous period of five months. During this time, I've been actively involved in diverse projects, leveraging my skills to provide comprehensive solutions. This experience has not only honed my technical capabilities but also enriched my understanding of client requirements, project management, and the dynamic landscape of freelance development.

Astrolab IT Academy | Uzbekistan, Tashkent

Frontend Developer | 02/2023 - 07/2023

As a frontend developer at Astrolab Company, I have been an integral part of a dynamic team, contributing my skills to enhance user experiences and bring innovative designs to projects. Through my meticulous approach to coding and a keen eye for design aesthetics, I've actively participated in projects that have not only met but exceeded client expectations. I worked as Frontend developer and participated in more than 5 real projects using my skills

Hoca Inc. | South Korea, Seoul

Full Stack Developer | 07/2023 - 12/2023

I have been employed at Hoca Inc for over half year, where I've actively engaged in diverse and impactful projects. My role as a Full Stack Developer has involved creating and maintaining CRM systems, online shops, navigation apps, automating social media, and developing portfolio websites. Through my expertise, I have successfully contributed to over five real projects, showcasing my proficiency and commitment to delivering high-quality results in the field of full stack development
